LLB Solutions

LLB LATAM Localization

For Microsoft Dynamics 365 Business Central

LLB Solutions has developed the LATAM localization for Microsoft Dynamics 365 Business Central, with the objective of being able to integrate different companies from different countries in the same productive environment, with intercompany functionality between companies from different locations, complying with the laws and tax regulations of each country.

LATAM Localization for Microsoft Dynamics 365 Business Central, will be enabled according to the company and the country where you are working. By indicating the company and country, you will only receive the location that is initially indicated, without affecting other companies that are in the same productive.

This localization allows all companies, both international and national, to use the same functionalities and reports, printed and/or electronic, in a single productive environment.

BENEFITS OF LATAM LOCALIZATION FOR MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

- **Increased productivity:** By integrating different companies into a single production environment, the complexity and management time of intercompany operations is reduced.
- **Increased profitability:** By complying with the tax laws and regulations of each country, fines and penalties that may affect the financial results of the companies are avoided.
- **Increased competitiveness:** By facilitating collaboration between different companies in different countries, synergies and business opportunities that may arise in different markets are exploited.
- **Saving money:** By working in a single production plant and not in a country-by-country production plant, infrastructure and maintenance costs are reduced.
